A.OmniStream .CO

Misión

OmniStream proporciona a personas y organizaciones una plataforma auto-hospedada para almacenar, categorizar, consultar y reproducir sus recursos multimedia de forma autónoma, segura y principalmente offline, manteniendo el control total de su información.

Visión

OmniStream se proyecta a 3 años como una solución de referencia en gestión multimedia auto-hospedada, reconocida por su modularidad, su experiencia de usuario multiplataforma y su independencia de servicios externos.

Objetivos

General:

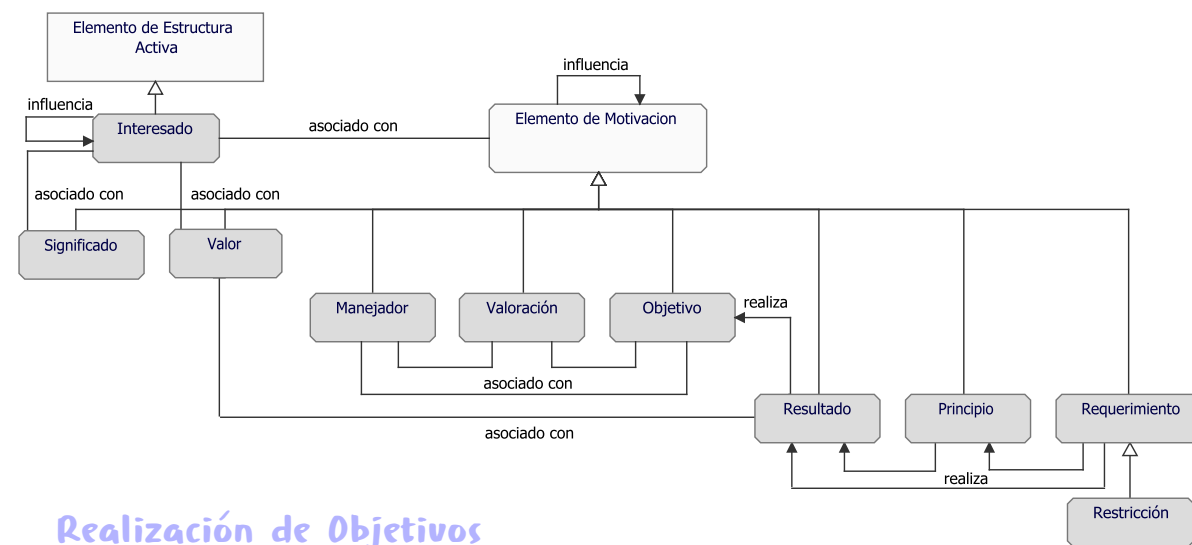

Diseñar e implementar un sistema modular de gestión multimedia que permita almacenar, organizar, consultar y reproducir contenido digital de manera eficiente y offline.

Específicos:

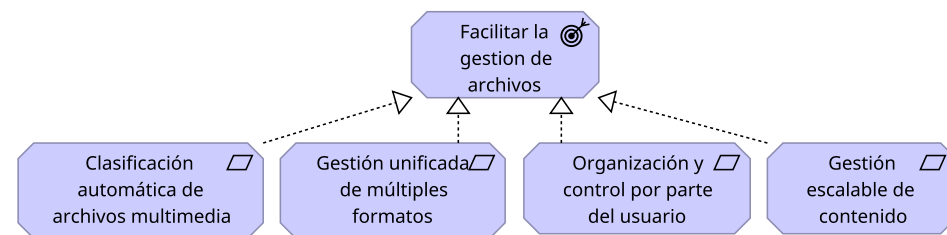

- Implementar un módulo de almacenamiento e indexación que procese múltiples formatos de video, imagen, audio y texto extrayendo sus metadatos automáticamente.
- Desarrollar un sistema de categorización, búsqueda y filtrado adaptable a los criterios de cada usuario u organización.
- Exponer servicios de reproducción multiplataforma (Web, Desktop y Mobile) con control de acceso por usuario y funcionamiento sin conexión permanente a Internet.
